Bootstrap, Foundation, responsive design, CSS sprites, CSS selectors

Other

GIT, SVN, Python, HTTP(S), JSON, OOP, Code review, BASH

Languages

Czech (native)

English (FCE course)

About me

Tech enthusiast and freelancer from the Ostrava region who moved to Prague to study right after high school.

My area of interest are web technologies focused on backend languages like PHP or Node.js. In my free time, I'm constantly working on several small projects which are constantly pushing my knowledge straight up, just check my Github. I'm focusing on good readability and universal solutions instead of some MacGyvering, to be proud of my commits.

When away from the keyboard, my love is playing the location-based game Ingress, which is keeping me walking outside around cities all over the world. I also enjoy escape-rooms, solving ciphers and puzzles and mostly attending cipher-related competitions, especially in combination with car driving.

Experience

2019 - now	PHP and Python developer	ČSFD.cz
Development of csfd.cz website and it's background applications. PHP (Nette), Oracle SQL, Python.		
2017 - 2019	PHP developer	StringData s. r. o.

References

tomas.palider.cz	Personal website built with Bootstrap, HTML, CSS and Javascript
ladislav.palider.cz	Same as above but for my father, Ladislav Palider
mc-miners.eu	Web page of the Minecraft server I have administrated
minPHPgallery	Image gallery in one PHP file with optional Google log-in
pldrGallery	Very advanced version of minPHPgallery rewritten in Node.js
BetterLocationBot	Helper Telegram bot for processing various of location formats
AreYouGreenBot	Multilanguage Telegram bot to manage members in Ingress communities

I have also developed **many** other mostly private projects such as php-template, single pages Pavlov sobě and Tech4Industry.cz, Ingress profile image generator, anonymous Pastebin alternative, tools for managing my own cloud network and other apps between multiple physical locations, realtime parsing and filtering emails, custom monitoring etc.
