Bootstrap, Foundation, Bulma, Font Awesome, LESS, responsive design, CSS sprites

Other

GIT, Python, Nginx, Scrapy, Telegram Bot API, Raspberry Pi, JSON Schema, RabbitMQ, Docker, Linux server management, OAuth, OOP, Code review, BASH

Languages

Czech - native

English - FCE course

About me

Tech enthusiast and freelancer from the Ostrava region who moved to Prague to study right after high school.

My area of interest are web technologies focused on backend languages like PHP or Node.js. In my free time, I'm constantly working on several small projects which are constantly pushing my knowledge straight up, just check my Github. I'm focusing on good readability and universal solutions instead of some MacGyvering, to be proud of my commits.

When away from the keyboard, my love is playing the location-based games Ingress and Geocaching which both are keeping me walking outside around cities all over the world. I also enjoy escape-rooms, solving ciphers and puzzles and mostly attending cipher-related competitions, especially in combination with car driving.

Experience

2019 - now	PHP and Python developer	ČSFD.cz
	Development of csfd.cz website and it's background applications. PHP (Nette), Postgre SQL, Python.	
2017 - 2019	PHP developer	StringData s. r. o.
	Development and administration of large scale banking applications. PHP (Nette), Oracle SQL, MSSQL, communicating with clients.	
2015 - 2017	PHP developer	CTECH s. r. o.
	Development of real-estate management tool. PHP (Nette), HTML, CSS, Javascript, Node.js	
2014 - 2015	PHP developer	Casablanca s. r. o.
	Developing tools for real-time processing of CCTV data. PHP (CodeIgniter), HTML, CSS, Javascript	

Education
