Bootstrap, Foundation, responsive design, CSS sprites, CSS selectors

Other

GIT, SVN, Python, HTTP(S), JSON, OOP, Code review, BASH

Languages

Czech (native)

English (FCE course)

About me

Tech enthusiast and freelancer from the Ostrava region who moved to Prague to study right after high school.

My area of interest are web technologies focused on backend languages like PHP or Node.js. In my free time, I'm constantly working on several small projects which are constantly pushing my knowledge straight up. I'm focusing on good readability and universal solutions instead of some MacGyvering, to be proud of my commits.

When away from the keyboard, my love is playing location-based game Ingress, which is keeping me walking outside around cities all over the world. I also enjoy escape-rooms and solving ciphers and puzzles.

Experience

| | | |
|---|---------------------------------|----------------------------|
| 2019 - now | PHP and Python developer | ČSFD.cz |
| Development of csfd.cz website and it's background applications. PHP (Nette), Oracle SQL, Python. | | |
