

Tomas Palider

Senior Full-Stack Developer

backend-focused

PHP · Node.js · Python

Prague, Czechia

Remote, hybrid, contract

tomas.palider.cz

tomas@palider.cz

IČO: 08374767

Skills

PHP

Nette, Latte, Composer, PHPUnit, PHPStan

Node.js

Express, Mocha, npm, modules

Python

Flask, Scrapy, scripting and automation

Database

MySQL, MariaDB, PostgreSQL, Oracle Database, MSSQL, Firebird, MongoDB, Redis, SQLite, database design, stored procedures

Frontend

Bootstrap, JavaScript, TypeScript, jQuery, Leaflet, Mapbox GL, Google Maps API, WebSocket, Chrome extensions, responsive design

APIs and integrations

REST API design, OAuth 2, Passkeys, multi-factor authentication, LDAP, Microsoft Entra ID, SMTP and IMAP, payment gateways, JSON Schema, RabbitMQ, Telegram Bot API

About me

I'm a senior full-stack developer with 10+ years of professional experience, focused on the backend: web applications, REST APIs and background services in PHP, Node.js and Python, paired with clean and simple Bootstrap frontends. I am also comfortable managing Linux servers and Docker containers. I focus on readable code and universal solutions instead of quick MacGyvering, so I can be proud of every commit.

I love automating things: from data processing and Telegram bots to home automation in Home Assistant and my own hardware projects with Raspberry Pi, Raspberry Pi Pico and ESP microcontrollers. Many of my side projects are open source on my GitHub.

Away from the keyboard, I play the location-based games Ingress and Geocaching, and I enjoy escape rooms, ciphers and puzzle competitions, especially ones combined with driving.

Experience

now – 2022 | **Senior PHP developer** | **MyQ**

Development of the award-winning print management solution MyQ X, mainly its Print Server and Central Server. Built the Chromebook extension MyQ X Chromebook Client.

PHP · TypeScript · Node.js · Firebird · MSSQL

2022 – 2019 | **PHP and Python developer** | **ČSFD.cz**

Development of the csfd.cz website and its background applications.

PHP (Nette) · PostgreSQL · Python

2019 – 2017 | **PHP developer** | **StringData s. r. o.**

Development and administration of large-scale banking applications, including communication with clients.

PHP (Nette) · Oracle Database · MSSQL

2017 – 2015 | **PHP developer** | **CTECH s. r. o.**

Development of a real-estate management tool.

PHP (Nette) · TypeScript · Node.js

Projects

BetterLocation	Tool for processing various location formats, also available as a Telegram bot PHP · MariaDB · JavaScript
AreYouGreen	Multilingual Telegram bot for managing members of Ingress communities Node.js · TypeScript · MariaDB

DevOps and tools

Git, Docker, Nginx, GitHub Actions, Linux server management, Bash, code review, AI-assisted development with Claude Code

Hardware and IoT

Raspberry Pi (incl. Pico), ESP microcontrollers, soldering, Home Assistant automations

Languages

Czech (native speaker)
English (B2)

pldrGallery	Standalone Node.js Express application for quick and convenient browsing of your multimedia files. Node.js TypeScript MariaDB

I also work on client projects as a contractor and on personal projects. A few examples:

- Web: php-template, anonymous Pastebin alternative, single-page websites Pavlov sobě and Tech4Industry.cz
- Ingress profile image generator
- PHP API wrappers for Mapy.cz, Glympse and Telegram Bot API
- Raspberry Pi projects such as car infotainment or an autonomous networked time-lapse camera
- Tools for managing my own cloud network and apps across multiple physical locations, real-time email parsing and filtering, custom monitoring
